Beginner Data
Warehouse

AGENDA

01 Useful links

02 What is StateDW

03 Making the connection

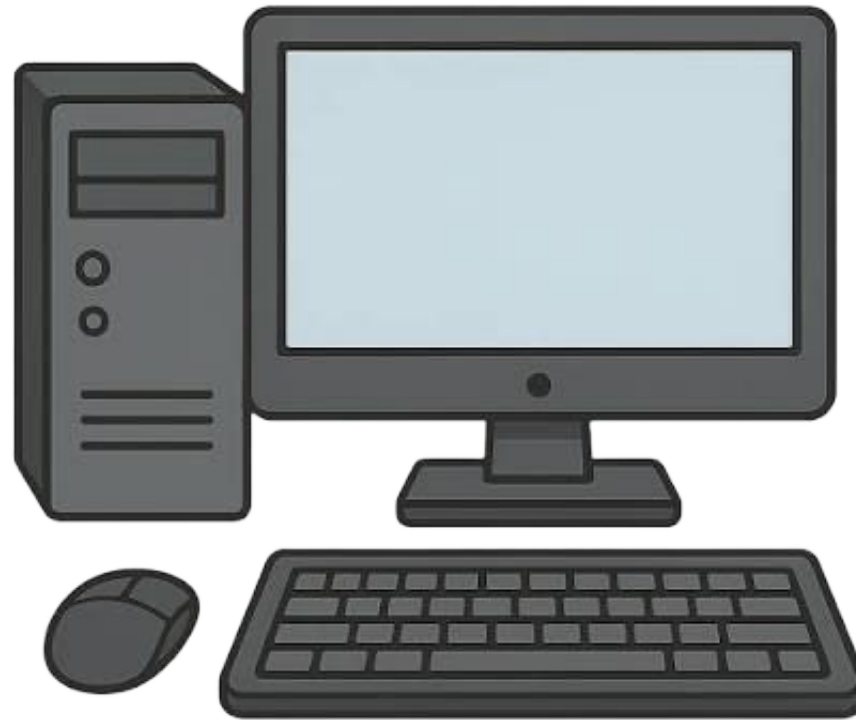

04 Navigating the Warehouse Structure

05 Pulling Data with the Legacy Wizard

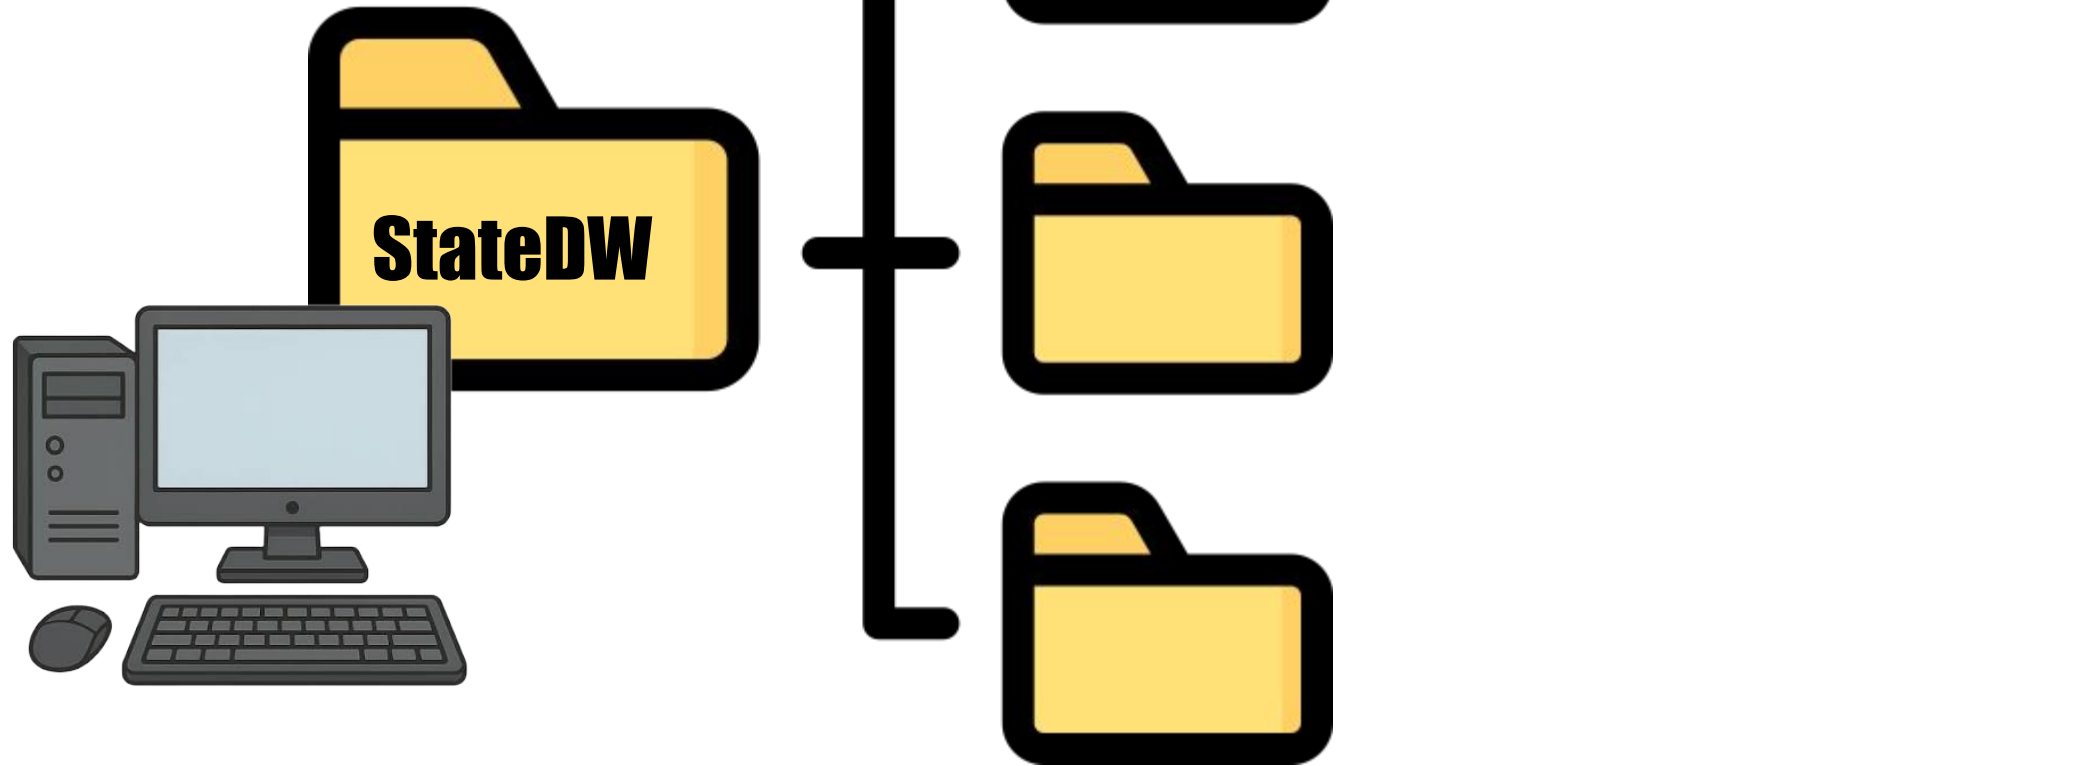

06 Frequently Asked Questions/Troubleshooting

07 Q&A

**SDW is a computer you access
remotely - A Server**

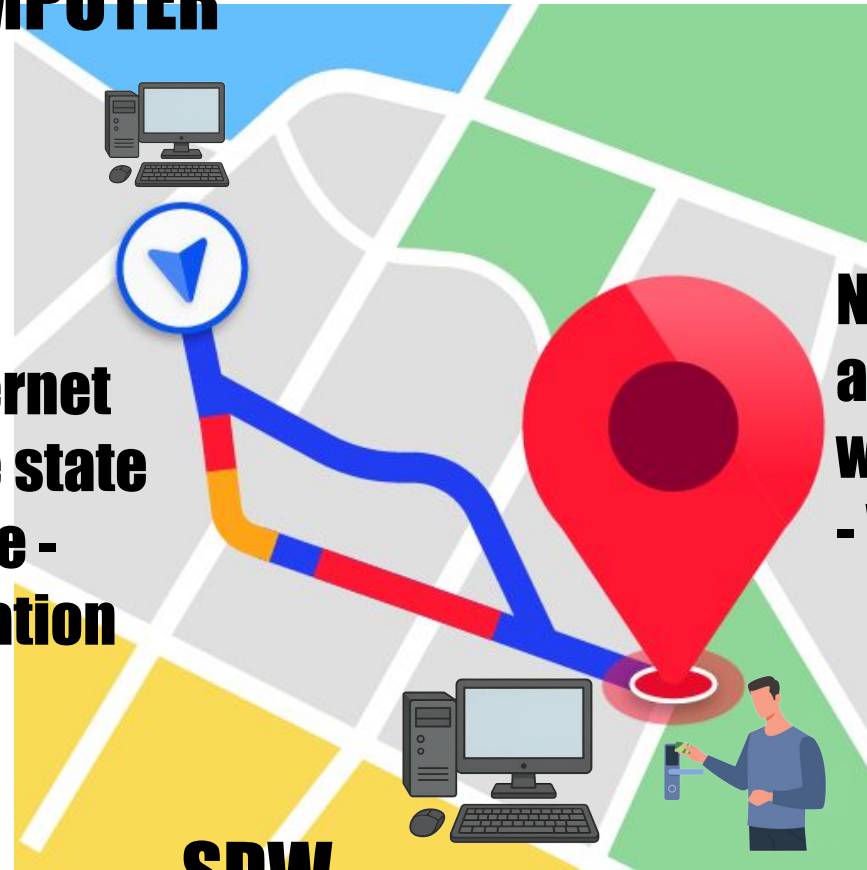

**It is dedicated to
storing data - A
Database Server**

TO ACCESS THAT DATA...

**YOUR
COMPUTER**

**Needs the “internet
address” to the state
data warehouse -
ODBC configuration**

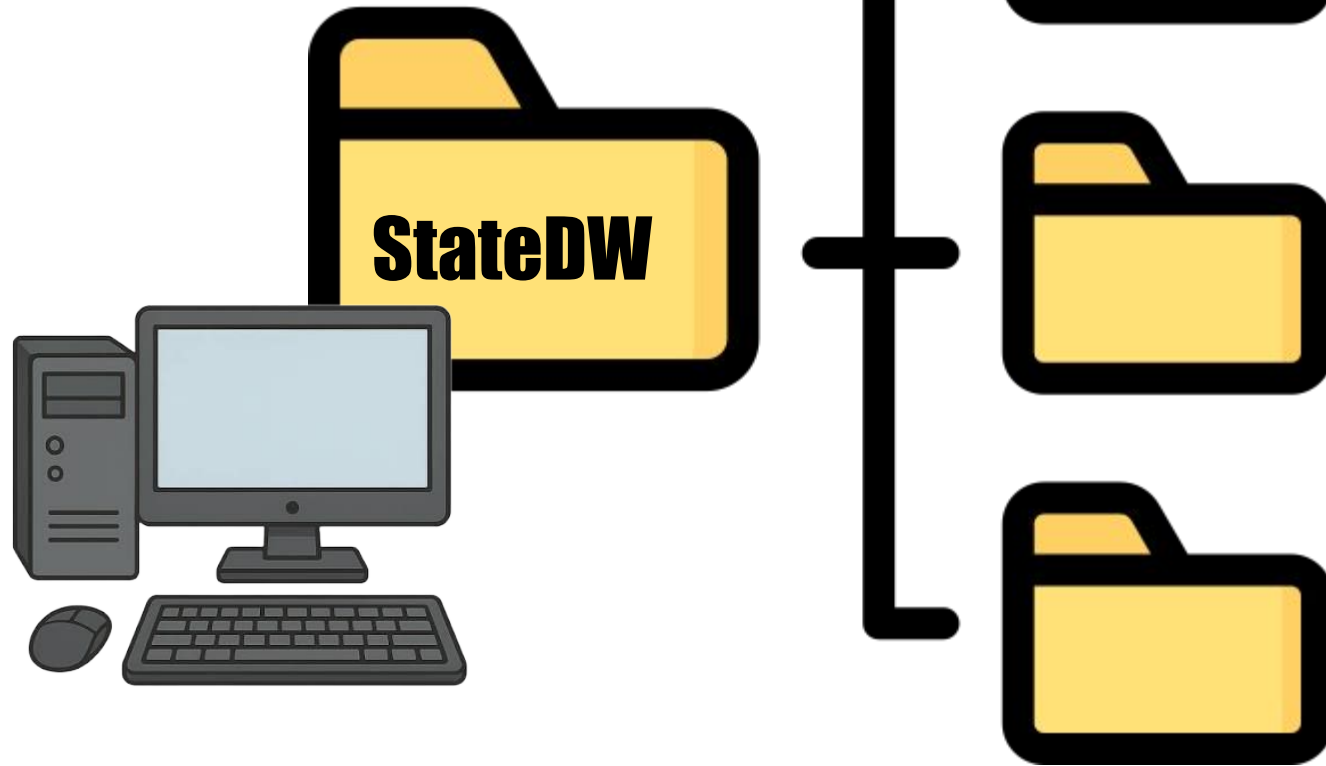

**SDW
COMPUTER**

**Needs “key card
access” into the data
warehouse “building”
- VPN configuration**

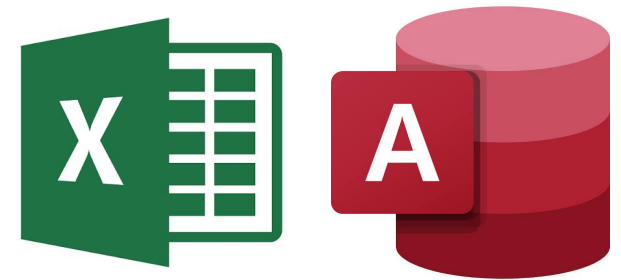

***These are configured by
DTS/DTS Finance***

With both of those things, you can access SDW data

AJ	Object	AJS	Account_Type

Using a variety of tools such as Excel, Access, etc.
